

## HIGH VOLTAGE DC BOOST MODULE (800-1000KV)

产品体积：长 88mm 宽 25mm 高 23mm

输出线：线径 2.2mm 长 260mm

输入线：线径 1.2mm 长 140mm

工作电压：DC6V+20%

工作电流：DC3A (+-10%)

输出电流：5MA (+-10%)

拉弧距离：10MM-15MM

电弧性质：高压高频高分贝冷电弧

工作模式：间断式（每次通电 1-5 秒）间隔 5-10

秒注意事项“高压输出不可超出拉弧距离工作，高压输出不可连在一起工作，模块不可超电压超电流输入，模块不可连续工作。

Product model: HIGH VOLTAGE DC BOOST MODULE (800-1000KV)

Product volume: 88mm long, 25mm wide, 23mm high

Output line: 2.2mm diameter Length 260mm

Input line: 1.2mm diameter, 140mm length

Working voltage: DC6V+-20%

Working current: DC3A (+-10%)

Output current: 5MA (+-10%)

Arc distance: 10MM-15MM

Arc nature: high voltage, high frequency, high decibel cold arc

Working mode: intermittent (1-5 seconds per power-on) 5-10 seconds interval

Precautions "High voltage output cannot exceed the arc distance, high voltage output cannot be connected together, the module cannot exceed the voltage and current input, and the module cannot work continuously.
